The Illinois Sustainable Technology Center (ISTC), a unit of the Institute of Natural Resources Sustainability at the University of Illinois/Urbana-Champaign, is a unique team helping businesses and citizens implement sustainable solutions to environmental and economic challenges. ISTC offers expert assistance on issues including:

- Waste minimization/pollution prevention
- Green business
- Energy efficiency
- Carbon foot-printing & reduction
- Water conservation
- Environmental cost analysis
- Life cycle analysis
- Systems engineering
- Laboratory analysis and support
- Fluid purification
- Alternative fuels and energy
- Pilot testing
- Sustainable design

The Center's mission is to conserve natural resources and energy, reduce waste, promote pollution prevention, and increase economic viability by providing:

- Information & Education
- Research
- Innovative technologies
- Technical Assistance

ISTC has served industry, governmental agencies and the public since 1985. ISTC has offices in Champaign, Oak Brook, Peoria and Brighton. For more information, contact Deb Jacobson at djacobson@istc.illinois.edu, (630, 472-5019), or check us out on the Internet:
